<div>Environmental Information</div> <div>A guide on fuel economy and CO₂ emissions which contains data for all new passenger car models is available at any point of sale free of charge. In addition to the fuel efficiency of a car, driving behaviour as well as other non-technical factors play a role in determining a car's fuel consumption and CO₂ emissions. CO₂ is the main greenhouse gas responsible for global warming.</div>

<div><div>(1) A new 1st year VED rate will be applied to cars registered for the first time (scheme effective from April 2010).</div><div>(2) The standard 12 month VED rate for all registered cars in this band is shown for the purposes of comparison. Note, figures quoted reflect the current rate only, and may be subject to change in the future.</div><div>(3) Please note that figures quoted are obtained under specific test conditions, they may not be achieved under 'real world' driving conditions. However, the figures serve as a means of comparing models of a similar type.</div><div>(4) A list of electric vehicle charging points is available here: http://plugsurfing.co.uk/.</div><div>(5) Not available for electric cars</div></div>
