

City of Oslo

Low Emission Transport – Oslo

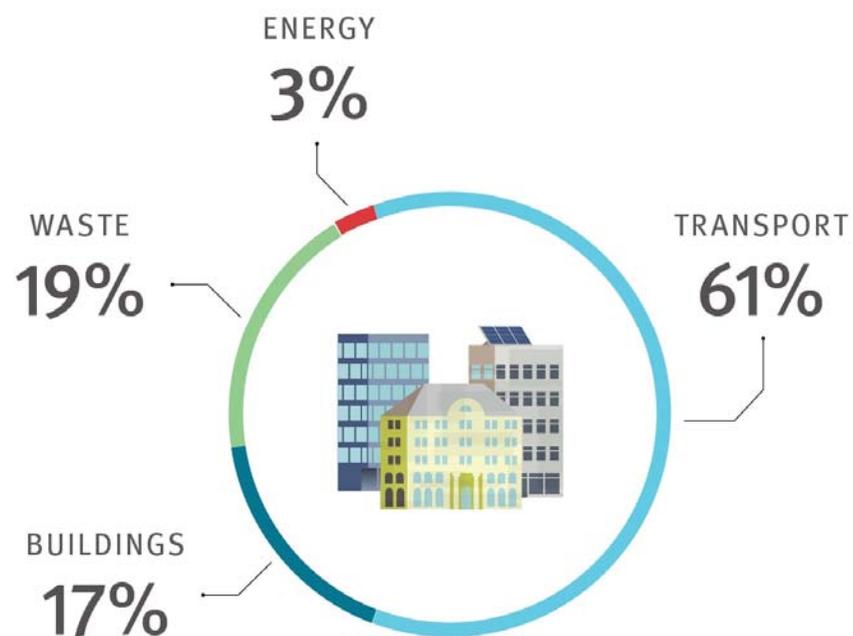

LowCVP Conference, June 27, 2017
Trude Rauken, Senior Adviser, City of Oslo

An aerial photograph of a city, likely Oslo, Norway, taken during sunset. The sun is low on the horizon, casting a warm glow over the city and the surrounding water. The city is densely packed with buildings, and a large body of water is visible in the background. A green semi-transparent box with a grid pattern is overlaid on the left side of the image, containing text.

Population: 670,000
2% annual pop. growth
Young population
High education levels
Strong immigration
Low unemployment
Building pressure

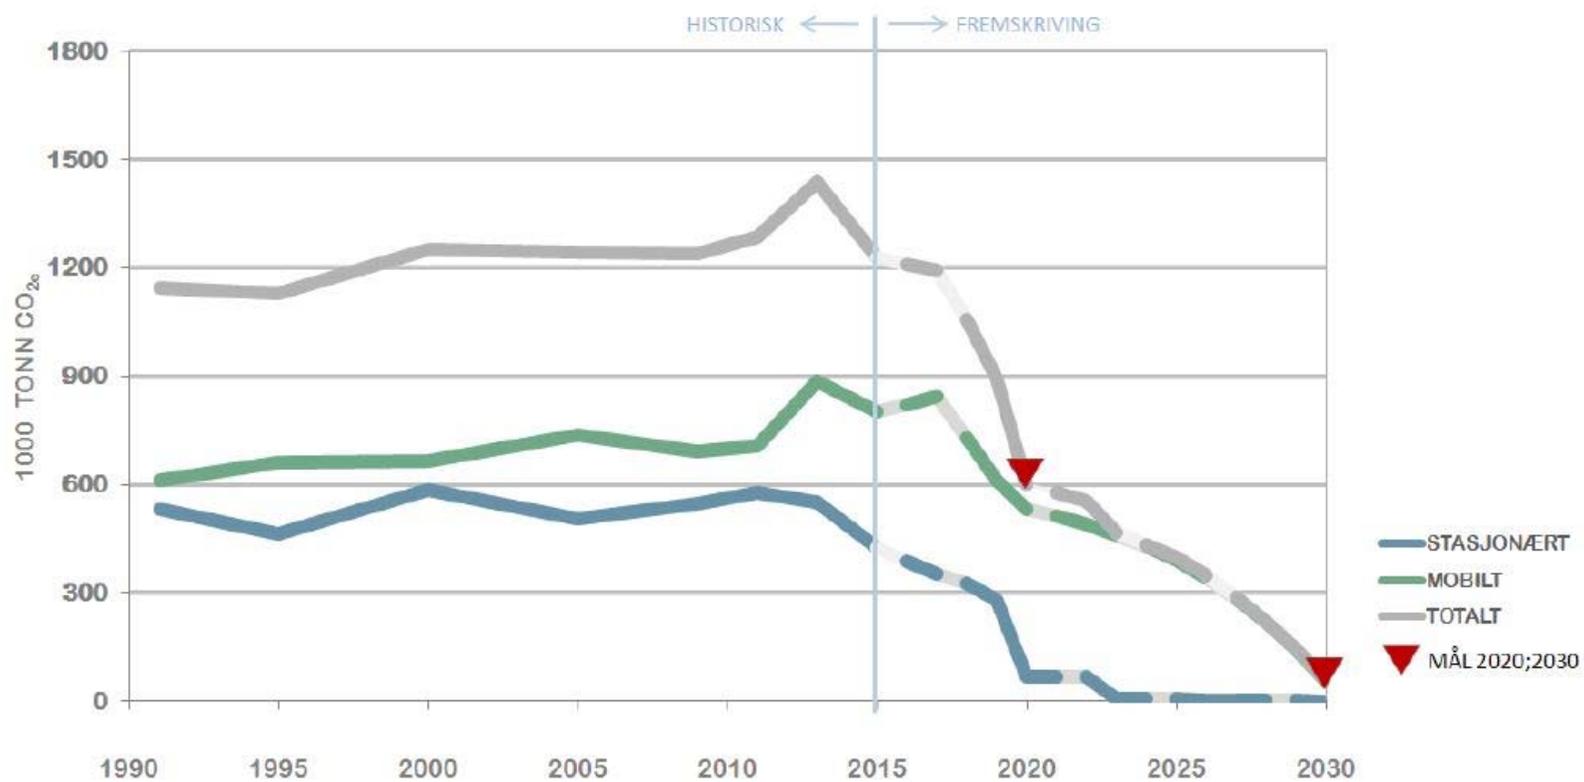

Emission mix – City of Oslo

Oslo Emissions

Reduction -16 % fra 2013 til 2015

The targets of the Climate and Energy Strategy for Oslo:

- To reduce greenhouse gas emissions by 50 per cent by 2020

and by 95 per cent by 2030.

Transport – main challenge

PRIVATE CARS  39%

TAXI  3%

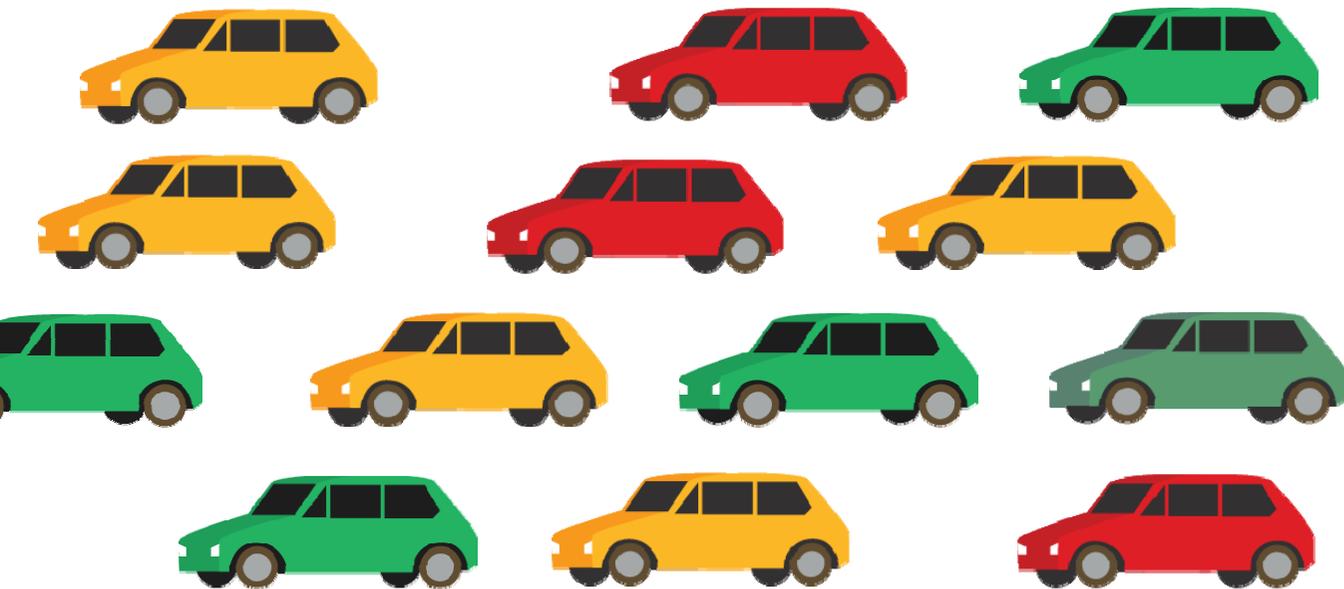

PUBLIC TRANSPORT  3%

LEIGHT FREIGHT VEHICLES  10%

HEAVY DUTY VEHICLES  15%

CONSTRUCTION MACHINERY  30%

D luftxødw

Oslo – the EV capital

Cheap to buy

- No VAT
- No registration fee

Cheap to use

- Free parking
- No charges at the toll ring
- Free electricity
- Free passage on ferries

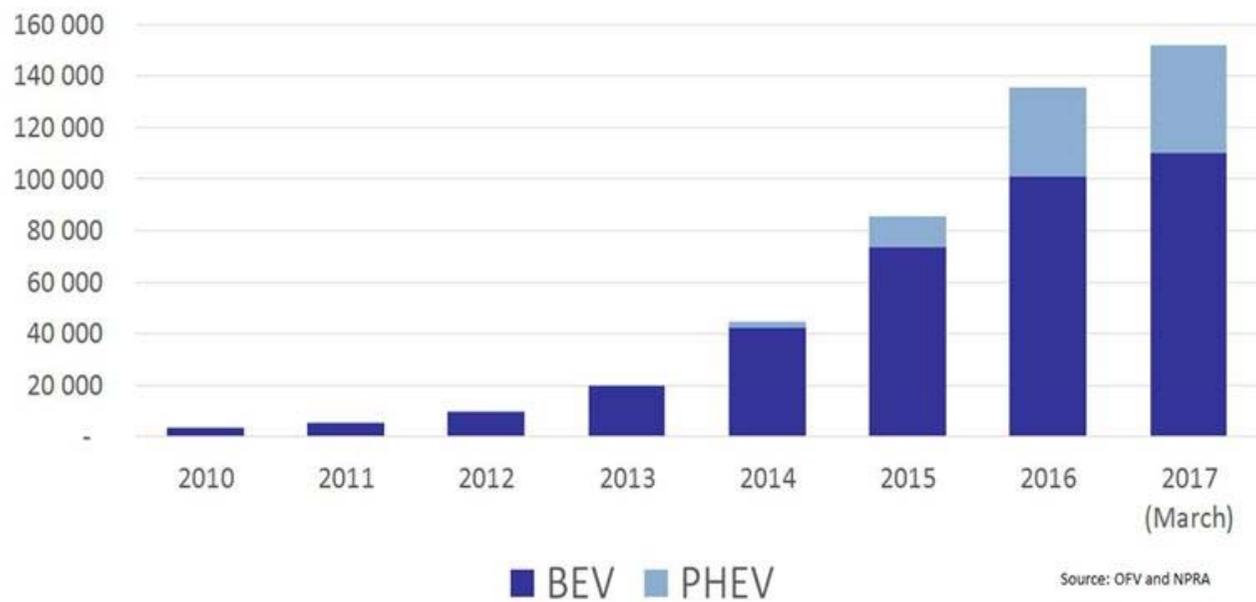

Easy to use

- Access to bus lane
- Public charging infrastructure

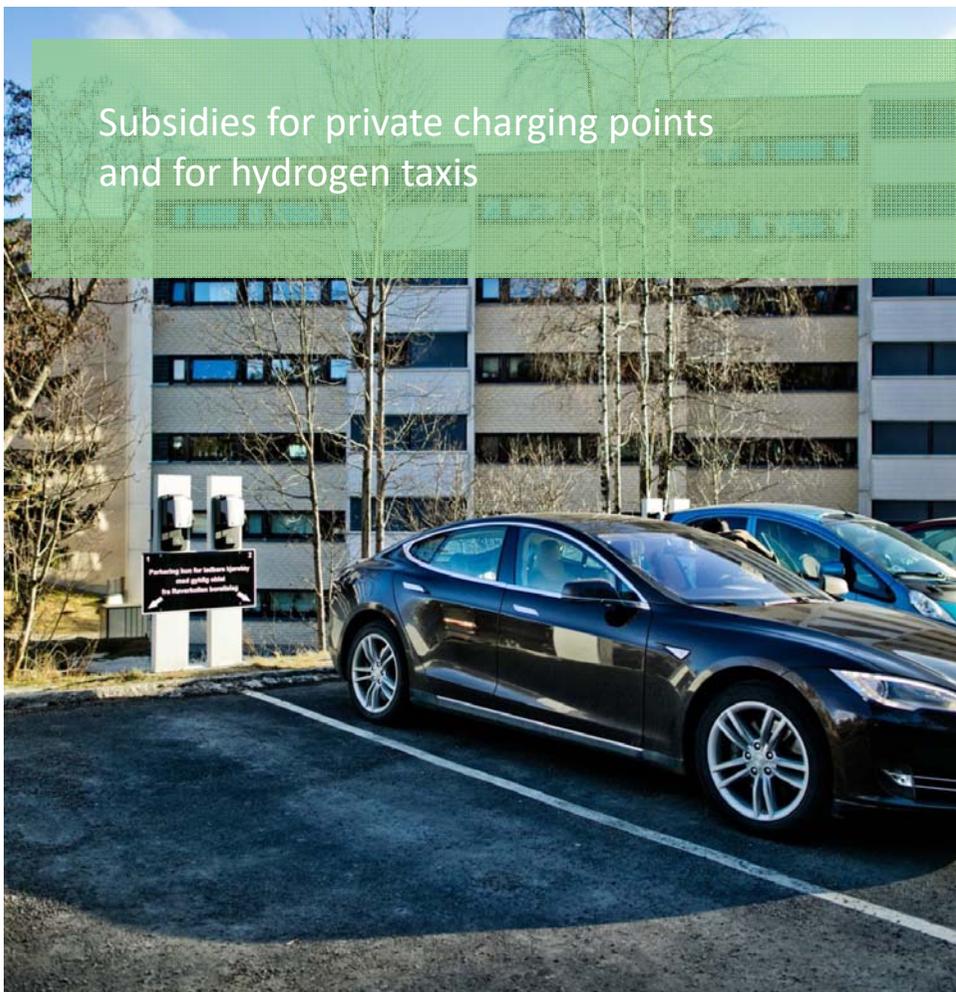

The Result: Exponential growth

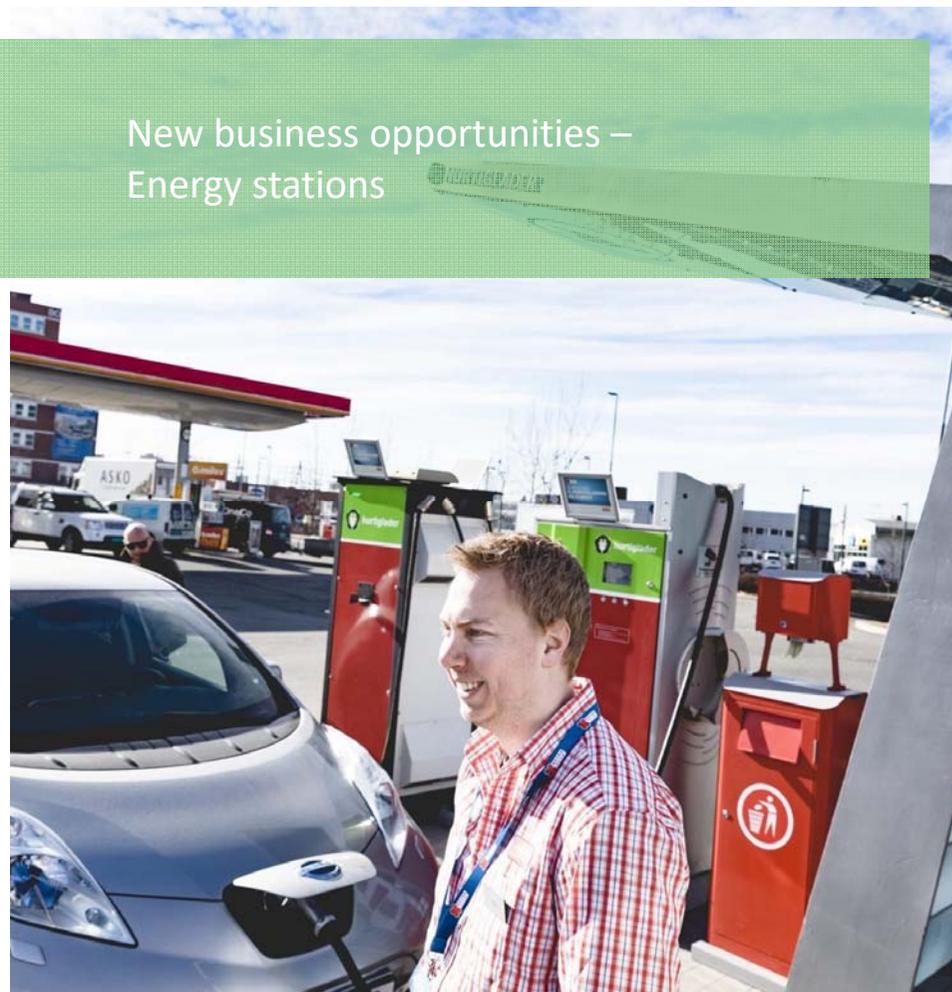

Subsidies for private charging points
and for hydrogen taxis

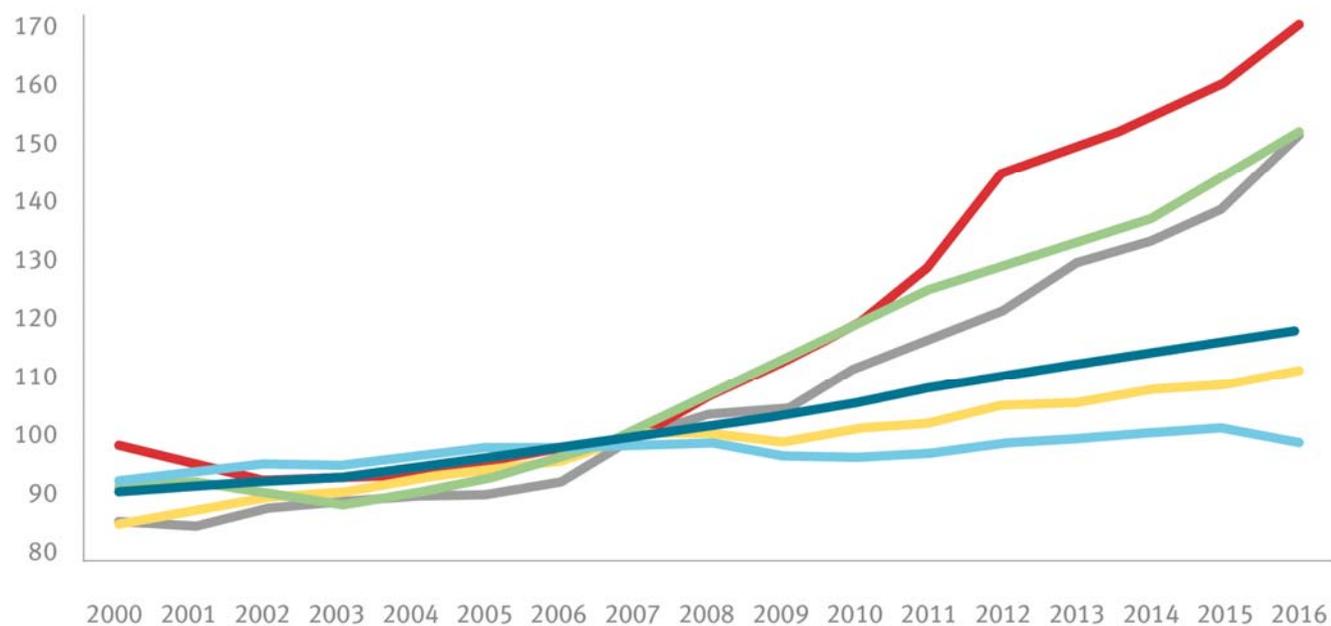

New business opportunities –
Energy stations

35 %

renewable energy in the bus fleet in 2016 (biofuels, hydrogen and biogas). In 2025 60 % would be fully electric

10 %

renewable energy at the harbour in 2016. Planned electric solutions and biofuels from 2018

Trams & Metro already run on renewable energy

Autonomous vehicles will be fully electric
