

# Progress through Partnership

LowCVP Annual Conference  
City Hall – 27<sup>th</sup> June 2017

**LowCVP**  
Low Carbon Vehicle Partnership

Connect | Collaborate | Influence

Andy Eastlake

Managing Director, LowCVP

# Touchpoints for a low carbon trajectory

Practical steps to accelerate the uptake of low carbon and low emission vehicles and fuels and support UK business and industrial initiatives

*“the brush strokes building the big picture”*

# Touchpoints for a low carbon trajectory

## AMBITION into ACTION

Stimulating Innovation and SMEs in new vehicle concepts and sectors with opportunities for the UK supply chain and long term mobility market

# Touchpoints for a low carbon trajectory

## STANDARDS for SUPPORT

Creating the assessment methods and criteria for support and policy incentives, giving clear direction for development

# Touchpoints for a low carbon trajectory

## DATA for DECISIONS

Turning robust data, into information, knowledge and creating simple tools and policies to enable sound market decisions

New Car Vehicle Label			
Make	Vauxhall	Model	Ampera
Engine	Electric/Petrol	Engine	1.4
Trans.	CVT	Trim	SK6, Nav, 17"
Emissions level	6C		
ULEV		ZE range miles	m/kWh
City	52	Normal	4.9
City	47	Normal	4.6
VED	£0	£140	CCT
8%			
Fuel Economy			
VED band and CO <sub>2</sub>		VED band and CO <sub>2</sub>	
g/km		g/km	
A		A	
27		27	
mpg		pence/mile	
City centre	28	13	
Urban	35	11	
Rural	42	9	
Motorway	63	8	
Overall	41.5	10.2	
Annual fuel cost	£278	Based on 10,000mils	Electricity £28
			Petrol £250

# Touchpoints for a low carbon trajectory

## ENGAGING with ENERGY

Joining the energy sector and infrastructure provision to the vehicle and user community to identify challenges and opportunities for low emissions mobility

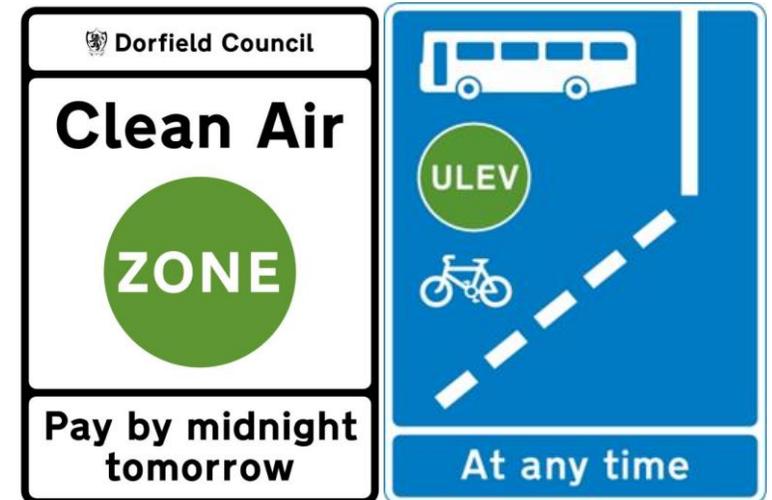

# Touchpoints for a low carbon trajectory

## ULEV UNDERSTANDING

Researching and creating the tools to ensure a common understanding of the terms and criteria, for maximum ULEV uptake

# Touchpoints for a low carbon trajectory

## RHETORIC to REALITY

Robust solutions for the existing fleet through technology and fuels for maximum immediate impact in low emissions and low carbon

# Touchpoints for a low carbon trajectory
